Office of the Administrator
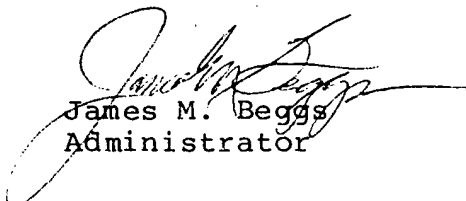

MAR 25 1985   1 APR 1985 LOGGED

Honorable John N. McMahon
Deputy Director
Central Intelligence Agency
Washington, DC 20505

Dear Mr. McMahon:

In the process of consulting with the Intelligence
Community on our proposed Memoranda of Understanding for Phase
B Space Station cooperation with Europe, Japan and Canada,
CIA's Technology Transfer Assessment Center has recommended
that the computerized data system and data link which we will
establish between NASA and our partners be secure. We
appreciate and share your concerns about the potential for
Soviet or other unauthorized access to the information in the
data system. To this end, we have already designed our
computer system for Phase B so that our programmatic
information system cannot be accessed by our foreign partners
because it will not be linked with the separate computer that
houses the shared data system. Furthermore, to prevent
unauthorized access to the shared data system, we will ensure
that we protect the transmission of data between our shared
data system computer and the computers of our foreign
partners. We will also ensure that appropriate procedures and
physical security measures are implemented to restrict access
to the system to personnel actively working on the cooperative
project.

With best regards.

Sincerely,

James M. Beggs
Administrator
